WHERE IT GOES
This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut 240 x 240 mm from 3 mm aluminium sheet; round the corners.

Centre hole 152 mm for the fan's inlet: drill a ring of holes inside the line, cut out, file to the line (or use a 152 mm hole saw).

Fan screws: four 4.4 mm holes on an 80 mm radius at 45 degrees, countersunk from the front; match them to the fan you buy.

Wall screws: four 4.4 mm holes 105 mm each side of centre at the corners, countersunk from the front.

Grille screws: four holes tapped M4 (drill 3.3) 110 mm from centre on the centre lines, top, bottom, left and right.

Fit: fan body flat on the back of the plate; plate flat on the wall over the 200 mm sleeve; grille over the plate.

Check: the fan screws pull the fan face flat onto the plate.
